

Insurance

Last Modified on 21/08/2024 10:42 am AEST

The instructions in this article relate to **Insurance**. The icon may be located on your [StrataMax Desktop](#) or found using the [StrataMax Search](#).

The **Insurance** screen is where you can keep a record of all the insurance policies the building has. Insurance claims are managed in [Insurance Claims](#).

We also have a video, which covers the **Insurance** screen, as well as other features and functions in StrataMax that are used to manage a building's insurance, which you can watch [here](#).

It is recommended to setup the [Dashboard](#) to monitor expiring Insurance policies.

It is recommended that the details for insurance policies are up to date at all times since this information is required for [Certificates](#) in all states.

Master Chart Insurance

Whilst each building has its own set of local policies, the [Master Chart Building](#) contains all the policies that have ever been created in StrataMax. Once new policies have been added to the [Master Chart Building](#), they can then be added to the [Base Building](#).

1. Open the [Building Selector](#) and select the [Master Chart Building](#) link at the bottom.

Number	Name	Year Start	Year End	Account Manager
111145	TEST	01/05/2021	30/04/2022	
90537	THE ADDRESS - VIUKON	01/01/2021	31/12/2021	Jenny Ma

2. Search or select **Insurance**.
3. Click *Cancel* when the insurance code selection screen appears and in the new screen, click *New*.

- The *Add New Code* window will appear.
4. Type in a new *Account Code* and *Description*, and click *Add This One*.

Base Building Insurance

The insurance policies that are in the *Base Building* will be the default policies that appear in any new buildings that you create. When you add a new policy to the *Base Building* only new buildings you create manually from that point onwards will include the new *Base Building* policies automatically.

1. Open the *Building Selector* and select the *Base Building* link at the bottom.

Number	Name	Year Start	Year End	Account Manager
111145	TEST	01/05/2021	30/04/2022	Lenny Ma
90537	THE ADDRESS - VILKON	01/01/2021	31/12/2021	Lenny Ma

2. Search or select **Insurance**.
3. Click *Cancel* when the insurance code selection screen appears and in the new screen, click *New*.
4. The *Add New Code* window will appear where you can either:
 - Select a policy from the *Master List* on the left side and click *Add This One*.
 - Type in a new *Account Code* and *Description*, and click *Add This One*.

Insurance | File Menu

Show Users

See [Insurance Claims](#).

Customise

Use this menu to change the background colour of the *Name* column in the **Insurance** screen.

Change Building

Displays the *Building List* window so you can quickly get to the **Insurance** screen in that building.

View Edit Log

Displays a log of all the changes that have been made to the insurance policies in this building.

Exit

Closes the **Insurance** screen.

Insurance | Configuration

General

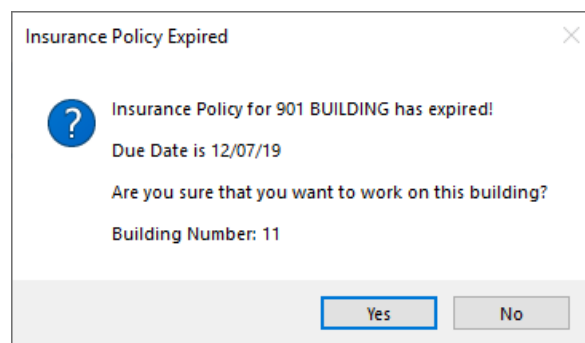

Always show code selection list at start

If ticked, the existing list of policies will always appear when the **Insurance** screen is opened.

Insurance

Insurance Expiry Test

Chose which insurance policy the system uses to compare against the working date, and if the insurance has expired, a notification will be displayed whenever the building is selected. The default main policy is **901 BUILDING**. You can remove this system check by clicking *Clear*.

Insurance Claims Register

Show Paid Claims

If set, paid claims will be listed in **Insurance Claims** and Insurance Claims Special

Add an insurance broker and/or company (Certificate Applicants)

There are two ways you can add an insurance company or broker. Either whilst you are adding an insurance policy through the **Insurance** screen, which is covered below, or in **Certificate Applicants**, which is detailed in the corresponding article under the section '*Creating a new applicant*'.

1. Search or select **Insurance**.
2. The *Insurance Schedule* will appear with all existing insurances if insurance policies have been set up previously or if they were set up in **Base Building**.
3. Click *Cancel*, and in the new window, click the *Ins. Companies* button.
4. When the *Applicant Maintenance* window appears with all the existing insurance companies, click the *Cancel* button.
5. In the new window click the *New* button, then enter at least the following information:
 - *3 Description*: the company name.
 - *4 Salutation 1*: this will copy the contents from the cell above, but you may need to click the *Switch*

button to re-arrange the text.

- *5 Address (1)*: This should be the name of the insurance broker.
- *6 Address (2)*: This is the first address line of the insurance broker.
- *7 Address (3)*: This is the second address line of the insurance broker.
- *13 Business Category*: double-click the cell then click the drop-down arrow, which displays a list.
Double-click the *Insurance* option.

6. Click the *Save* button.
7. Click the *Exit* button.

Add an Insurance Policy to a Building

Follow these instructions to enter a new Insurance Policy on an existing building, or for a brand new building just taken over.

1. Search or select **Insurance**.
2. The *Insurance Schedule* will appear with all existing insurances if insurance policies have been set up previously or if they were set up in **Base Building**.
3. Click *Cancel* and in the new screen, click *New*.
4. The *Add New Code* window will appear where you can either:
 - Select a policy from the *Master List* on the left side and click *Add This One*.
 - Type in a new *Account Code* and *Description*, and click *Add This One*.

Code	Policy Type
911	MACHINERY BREAKDOWN
912	LOT OWNERS IMPROVE
913	WORKERS COMPENSATION
914	CONTENTS
915	OFFICE BEARERS LIABI
916	PERSONAL ACCIDENT
917	GOVT. AUDIT & LEGAL
918	LOT OWNERS' FIXTURES
919	COMMON PROPERTY
920	GOVERNMENT AUDIT COS

Code	Policy Type
901	BUILDING
902	LOSS OF RENT
903	CATASTROPHE
904	PUBLIC LIABILITY
905	FIDELITY GUARANTEE
906	OFFICE BEARERS
907	VOLUNTARY WORKERS
908	GOVT AUDIT COSTS
909	LEGAL EXPENSES
910	WORKPLACE H&S

5. Back in the *Insurance Schedule* window, you will need to enter the details for at least fields *5 Company* and *8 Due Date*, but for reporting and certificate purposes it's recommended to enter any details available on your insurance documents:
 - *3 Policy Type*: This will update automatically with the details from the *Description* field.

- *4 Sum Insured*: This is a free text field with a 30 character limit.
- *5 Company*: Double-click the field to open the *Select Applicant* window and chose the insurance company.
- *6 Policy Number*:
- *7 Premium*:
- *8 Due Date*: Double-click and you can either type in the date or click the drop-down arrow to select the date from the calendar.
- *9 Excess Details (1)*: This is a free text field with a 60 character limit.
- *10 Excess Details (2)*: This is a free text field with a 60 character limit.
- *11 Broker/Agent*: A free text field with a 30 character limit, which may be populated automatically if the company already had these details inserted.
- *12 Broker Agent Address (1)*: A free text field with a 30 character limit, which may be populated automatically if the company already had these details inserted.
- *13 Broker Agent Address (2)*: A free text field with a 30 character limit, which may be populated automatically if the company already had these details inserted.
- *14 Telephone*: A free text field with a 15 character limit, which may be populated automatically if the company already had these details inserted.
- *15 Facsimile*: A free text field with a 15 character limit, which may be populated automatically if the company already had these details inserted.
- *16 Last Date Paid*: Double-click and to either type in the date or click the drop-down arrow to select the date from the calendar. This can be updated automatically after [Premium Accounts](#) have been set up, and a creditor invoice is saved with that premium account as the expense code.
 - Bear in mind that this may not always be the date the insurance premium was paid, but merely the date the invoice was processed. This could vary depending on the timing and frequency of processing of payments in your office, especially if payments are subject to approval on the [Invoice Hub](#).
- *17 Comments*: A free text field with a 30 character limit.
- *18 Account Group*: This field can only be edited if [Account Groups](#) have been set up for this building. Double-click and use the drop-down arrow to display the current available account groups, and select the one you need.

6. Once all details are entered, click *Save* and *Exit*.

Insurance | Notes

As with many other areas of StrataMax, the Insurance screen also has this feature for individual policies. Notes can be added, edited, or deleted creating a new policy or editing an existing one. Each policy will have its own file bearing the account number with a .NOT extension (e.g.: 901.NOT for BUILDING insurance) containing the text, which may be viewed and printed in Notepad.

To learn more about the Notes screen, check out our main [Notes article](#).

If a policy has any notes, the *Notes* button will have an icon on it.

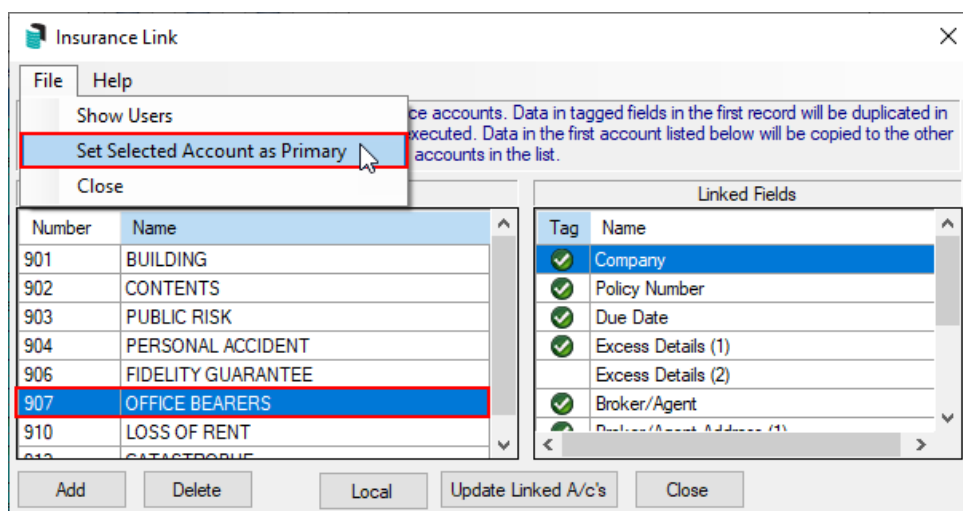

Insurance | Update Others

This button enables you to copy the details from the building's primary insurance policy/account (901 BUILDING by default) to any or all of its other policies. The intention behind this feature is to save time on data entry by effectively copying information from certain fields in the main policy to the same fields in the other policies.

By default, 901 BUILDING is the primary insurance account for every building. This means it's the insurance policy that the system observes when using the *Update Others* function. However, it can be changed if you prefer:

1. Search or select **Insurance**, and click *Cancel* if the list of policies appears.
2. Click the *Update Others* button.
3. In the *Insurance Link* window, in the *Linked Accounts* section on the left, select the account you want to be the primary.
4. Click *File > Set Selected Account as Primary*.

Not every field in the policy can be linked. Purely because some of the fields need to be unique. The fields that aren't available for linking are:

- **Policy Type:** Building, Machinery Breakdown, Public Liability, etc.
- **Sum Insured:** This will be different for each policy type.
- **Premium:** This will be different for each policy type.

Once policies have been updated with the *Update Others* feature, it cannot be reversed automatically. You will need to edit each of the policies manually.

To use the *Update Others* feature, follow these steps:

1. Update the *BUILDING* insurance policy with all the necessary details and save (see the [above section](#) for instructions).
2. Click the *Update Others* button.
3. In the *Insurance Link* window, in the *Linked Accounts* section on the left, check that all policies you want to update are present.
 - The policy at the top of the list should be the *BUILDING* policy, containing all the necessary details to copy the other policies.
 - We recommend clicking *File* menu at the top and selecting *Set Selected Account as Primary* to ensure that the *BUILDING* policy is retained and used for the updating.
 - You can add or delete any policies from this list by clicking the appropriate buttons at the bottom.
4. In the *Linked Fields* section on the right, tag each of the fields you want to update.
5. Click the *Update Linked A/c's* button, then *Close*.

The screenshot shows the 'Insurance Link' window with a menu bar (File, Help) and a red-bordered text box at the top: 'This program is for setting up links between insurance accounts. Data in tagged fields in the first record will be duplicated in linked accounts when Update Linked Accounts is executed. Data in the first account listed below will be copied to the other accounts in the list.' Below this are two tables: 'Linked Accounts' and 'Linked Fields'. The 'Linked Accounts' table has columns 'Number' and 'Name', with the first row (901, BUILDING) highlighted in blue. The 'Linked Fields' table has columns 'Tag' and 'Name', with several rows checked with green checkmarks. At the bottom, the 'Update Linked A/c's' button is highlighted with a red box. A callout box on the left says 'The details in this policy will copy to the policies beneath.' and a callout box at the bottom says 'Click when ready to update the other policies'.

Linked Accounts		Linked Fields	
Number	Name	Tag	Name
901	BUILDING	<input checked="" type="checkbox"/>	Company
902	LOSS OF RENT	<input checked="" type="checkbox"/>	Policy Number
903	CATASTROPHE	<input checked="" type="checkbox"/>	Due Date
904	PUBLIC LIABILITY	<input checked="" type="checkbox"/>	Excess Details (1)
905	FIDELITY GUARANTEE	<input checked="" type="checkbox"/>	Excess Details (2)
906	OFFICE BEARERS	<input checked="" type="checkbox"/>	Broker/Agent
907	VOLUNTARY WORKERS	<input checked="" type="checkbox"/>	Broker/Agent Address (1)

Set up a Premium Account

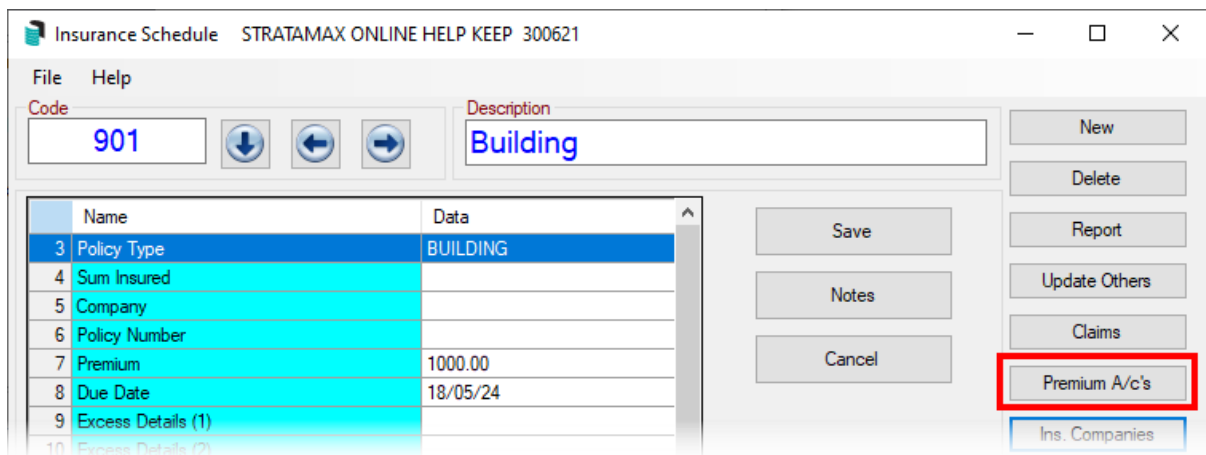

Premium accounts in the **Insurance** screen are designed to link any creditor invoices for insurance to an insurance policy. This link can be set globally for your entire portfolio, or locally per building, and you can have multiple links between different policies and expense codes. The results of this link are:

- A notification within the **Creditor Invoices** screen, which appears whenever the linked insurance expense or

refund code is used. The notification will prompt you to confirm the insurance premium amount, date paid and due date.

- When *receiving* an insurance refund through the **Bank Reconciliation**, a notification appears, prompting to chose an insurance claim to finalise.

1. Search or select **Insurance**.
2. Click the *Premium A/c's* button on the left side.

3. Select the *Global* or *Local* radio button.
 - *Global* is selected by default.
 - If selecting *Local* for the first time in the building, you will see this notification. You can chose whichever you prefer:

4. In the *Insurance Premium Payment Accounts* window, click the *Add* button.
5. A new window will appear with a red background, containing a list of all the insurance policies. Double-click the policy to link.
6. Another window with a teal background will appears and has a list of all your account codes. Double-click the expense account you want to link to the insurance policy.
7. The final window with a green background will appear, containing all your account codes again. Double-click the income code that refunds will be posted to.
8. Continue to add more links by repeating the above steps, or close the **Insurance** screen.

Insurance Premium Creditor Invoices

1. Search or select **Creditor Invoices**.

2. Enter all required details as usual, ensuring you use the expense account that is linked in the **Insurance** > *Premium A/c's* menu, then click *Save*.
3. When the prompt appears...
 - click *Replace Premium* if you want to replace the existing premium amount with the one in this creditor invoice.
 - click *Add to Premium* if you would like to add the paid figure to the existing premium amount.
 - click *No Action* if you do not want to update the insurance.
4. If the *Insurance Update* window appears, modify the information if required and click *OK*.

Now if you open **Insurance**, and look at the corresponding policy, you will notice that the *Premium*, *Due Date*, and *Date Last Paid* cells have all been updated with the info from the creditor invoice.

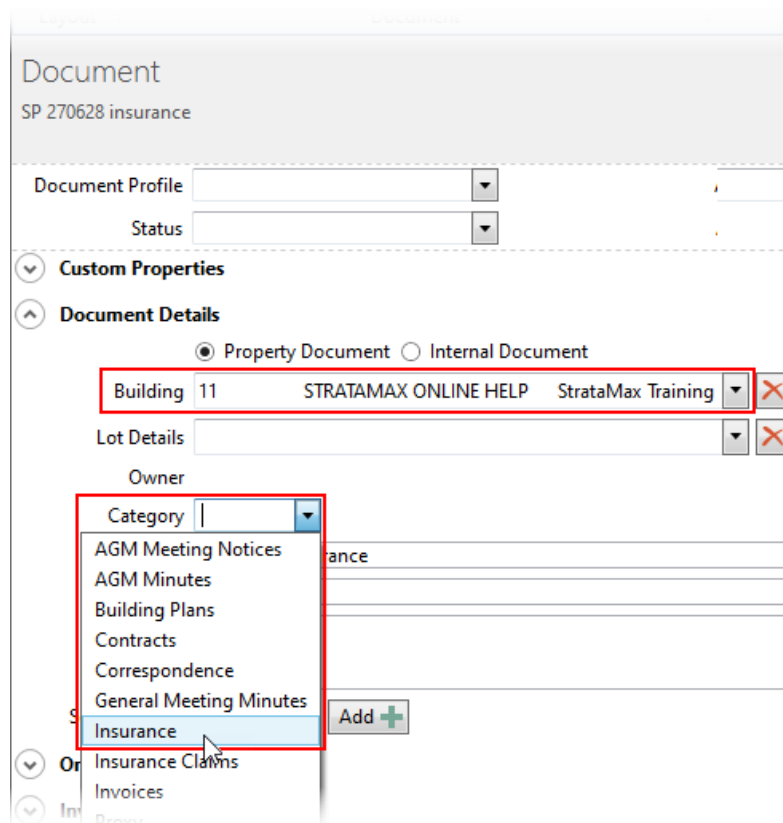

Insurance Refunds

Now that the *Premium Account* link has been set up, you can receipt and link insurance refunds to insurance claims. Check out [this article](#) to learn how.

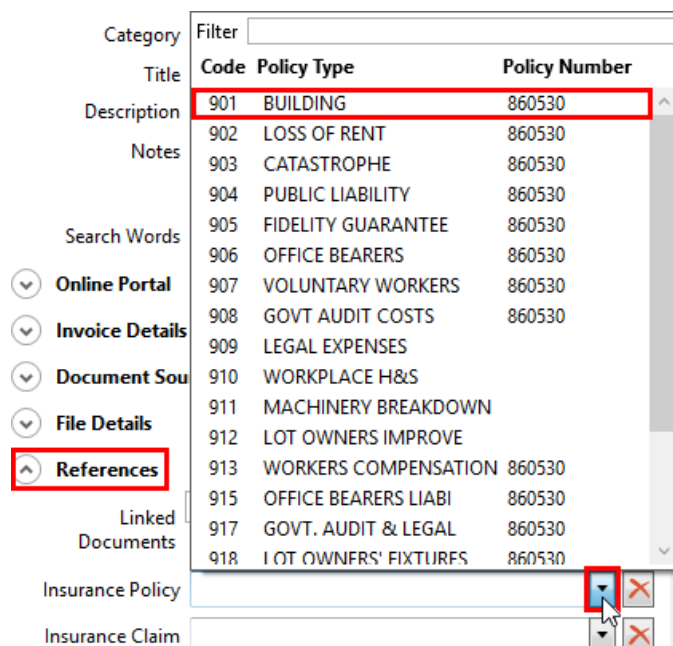

Attach an insurance document (policy or certificate of currency)

From within the **Insurance** screen, a policy document can be added for easy reference. This can be any insurance related document like, and need to be added through DocMax first. You can also have a separate document for each insurance policy type if required - one for building, contents, etc., and another for Public Liability, for example.

1. Add the insurance policy document to [DocMax](#), ensuring that the correct building is selected and the *Category* is set to '*Insurance*' .

2. And Under the **References** section, select the 901 BUILDING policy (or other policy of choice) from the drop-down.

Viewing the Insurance Policy

1. Search or select **Insurance** and double-click the required policy.
 - o In most cases the 901 BUILDING policy is the main policy for the building, but it can be any policy that has a document attached to it.

2. Click the *View Policy* button.
3. The *DocMax Document View* window will display all of the DocMax details entered and a preview of the document.

Name	Data
3 Policy Type	BUILDING
4 Sum Insured	\$5,873,088
5 Company	Smoh Insurance
6 Policy Number	860530
7 Premium	9000.00
8 Due Date	12/07/21
9 Excess Details (1)	300.0000
10 Excess Details (2)	
11 Broker/Agent	SMOH Brokers
12 Broker/Agent Address (1)	175 Varsity Parade
13 Broker/Agent Address (2)	Varsity Lakes QLD 4221
14 Telephone	07 1234 5678
15 Facsimile	

Edit or Delete Insurance Information

Edit (Update Insurance Policy)

1. Search or select **Insurance**.
2. Select the required policy and click *OK*. (Choose code 901 for updating all policies)
3. Make any changes required (see the *above section* for details) and click *Save* and then *Exit*.
 - If this insurance policy is linked to others, click the *Update Others* button.

Delete

1. Search or select **Insurance**.
2. Select the required policy and click *Delete*.
3. Click *Yes* to both confirmations.

Insurance Reports

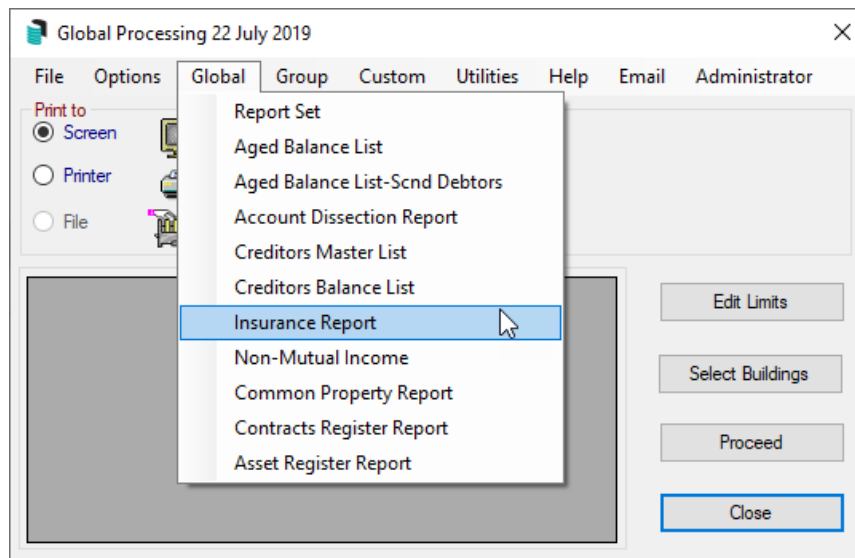

In StrataMax, there are two insurance reports that can be produced in a PDF format, and there is a local and global extract as well, which can be produced from the *Search Insurance* screen. The report produced in the *Insurance* screen is limited to the building selected, whilst the report produced in *Reports / Utilities (Global)*, and the extract produced in *Search Insurance* have the option to include several or all buildings. The insurance report also has multiple templates to choose from, however none of them can be modified.

Local Insurance Report

1. Search or select **Insurance**.
2. The *Insurance Schedule* will appear with all existing insurances if insurance policies have been set up previously or if they were set up in **Base Building**. Click *Cancel*.
3. In the top left of *Report Setup* screen, there are three radio buttons to choose from:
 - Screen: produces an on-screen preview of the report.
 - Printer: prints the report without any preview.
 - Excel: Exports the report to *Excel*.
4. In the top right, you can choose the template you want by clicking the top ellipsis button next to *Template*.
5. Under the *Template* selection ellipsis, there is also an ellipsis button to choose a *Printer*, how many copies of the report you would like to print, and the paper source.
6. Under the **Limits** section, double-click the blank cell under the *Limit Data* header, and in the *Tag as Required* window, tag the required insurance policies to include in your report, and click *OK*.
 - Each policy tagged will appear on the report, even if it doesn't contain any data.
7. Click *OK*, and depending on your selection in *step 3*, the report will either appear on screen, or print.

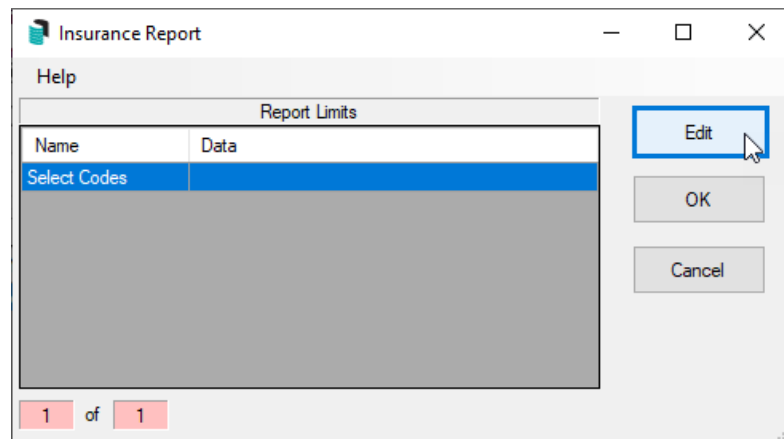

Global Insurance Report

1. Search or select the **Reports / Utilities (Global)**.
2. Click the *Global > Insurance Report*.

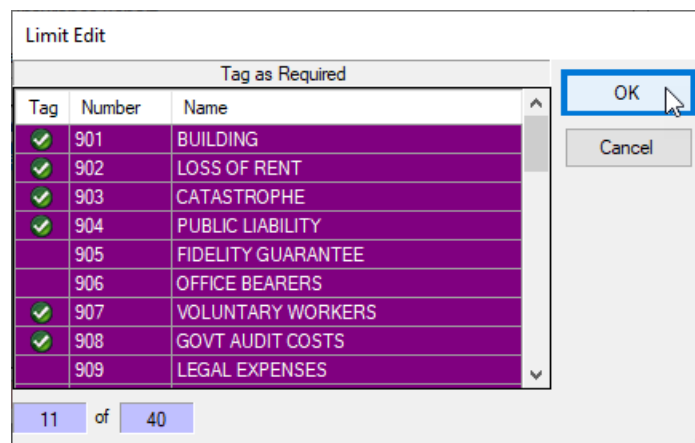

3. The window title will change to *Insurance Report *the day's date**, and several more options will appear.
4. In the top left in the **Print to** section, there are two radio buttons to choose from:
 - Screen: produces an on-screen preview of the report.
 - Printer: prints the report without any preview.

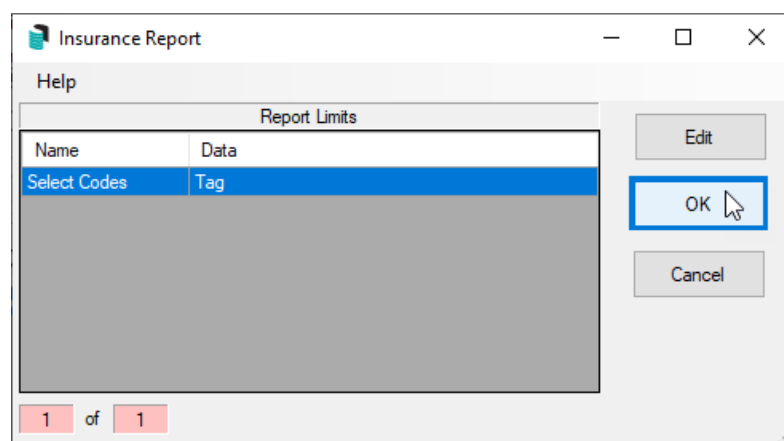

5. Under the *Printer Setup* section you can chose your printer, printer settings, paper source, number of copies, and more.
 - Take a look at our [Printer Setup article](#) for more information.
6. You can also select a template by clicking the ellipsis button [...] next to the *Template* section.
7. Click the *Edit Limits* button, and in the *Insurance Report* window click the *Edit* button.

8. In the *Limit Edit* window, tag the policies needed for the report, then click *OK*.

9. Back in the *Insurance Report* window, you will now see the word 'Tag' under the Data column. Click *OK*.

10. Now in the main report window again, click the *Select Buildings* button to tag a single, multiple, or all

buildings, then click *OK*.

11. Click *Proceed*, and depending on your selection in step 4, the report will either display on screen, one building at a time, or print to the printer selected in the printer setup.
