

Resubdivision Process

Last Modified on 13/01/2026 9:30 am AEST

The instructions in this article relate to **Resubdivision/ Reallocate**. The icon may be located on your [StrataMax Desktop](#) or found using the [StrataMax Search](#).

The **Resubdivision/Reallocation** screen is used to simplify the resubdivision of lots and amend lot entitlements for one or more lots.

This menu provides step-by-step screens for data entry and reports to check data validity before processing, and once applied, will automatically update the **Roll** when the final step is completed.

There is also the capacity to add new lots without affecting the entitlements of the existing lots. In the case of a developer, information can be populated from the Roll of an existing lot for the new lots, providing time-efficient, accurate, and streamlined set-up procedures.

It is essential to review the registered plan and entitlement schedules before initiating any of the processes provided in this module, to ensure accurate input of the *Date of Registration* and entitlement schedule.

Normally, there will be a remaining balance on extinguished lots (resub lot), which must be reallocated via any of the four options. With these options, it is important to understand that once a lot has been created in StrataMax, it cannot be deleted/ removed but rather extinguished, resubdivided or amended for the overall entitlements.

Please also check out our [video covering the new Resubdivision/Reallocate](#).

Important things to consider

The following areas require consideration before applying for any resubdivision or the addition of new lots.

1. Action the changes as soon as the registered documents are received.
2. **Lock** the building and keep it locked until the resubdivision process has been completed successfully.
3. **Data Storage**, with a custom backup destination. Data Restore is not generally completed; this is a critical backup that can be used by the StrataMax Support if required as a last resort. If the building has been unlocked or there have been any transactions, restoring the data is not an option.
4. **Building Information / Audit field**. You cannot adjust any levies that were generated in the old year,

including the first quarter of the current year, as this process will change the audited financial account balances.

5. Have a plan of what this process should result in, including a thought-out step-by-step document/notes to refer to. For example:
 - The date of registration and the levy period that this will impact.
 - Are there custom levy schedules involved? If so, future custom levies should be deleted and re-created once the resubdivision has been completed.
 - Is there a balance lot, and if so, is there a balance on this lot? How will this balance be distributed?
 - If there are two schedules to be adjusted, treat them as separate resubdivisions. For example, the contribution schedule, which affects Admin and Sinking Fund levies, should be treated as one process. And if the interest schedule changes, complete this as a separate resubdivision.
6. Review [Levy Registers](#), including the [Summary](#), before commencing and understand how this date and new lots may affect future levies.
7. Read the prompts on each screen, as they can affect the results of the resubdivision.
8. Review the Summary Report at the last step before processing the resubvision; it can be reviewed at any stage once each screen has been completed.
9. Please reach out to our Full Service team if you would like this process to be completed on your behalf (standard charges apply). This can be sent to fullservice@stratamax.com and should include a clear request with the registered documents.

Security Setup

This particular permission should be considered a high-level process and made available to experienced users only.

Access to this menu is held within [Security Setup](#) under the **Roll** menu category.

Resubdivision to Add New Lots

1. Search or Select ***Resubdivision / Reallocate.***
2. From the Main Menu - select *Resubdivide to add new lots.*
3. Enter the Date of Registration in *Plan/ Resubdivision Date.*
4. Select Lot for Resubdivision by clicking on the box with ..., and selecting the lot. The resubdivided lot will automatically have the *Lot Type* changed to 'Resubdivided' in the [Building Information Lot Type Editor screen](#) at the end of the process.
5. Select *Next* to move to the next setup screen.

Resubdivision / Reallocation of Entitlements

Plan/Resubdivision Date: 17/02/2020

NOTE: This process will handle adjustments to levies. You do not need to reverse or delete any future levies. No changes are made until the final step, and it is validated and processed as a single step.

	Current	New	Resub	Total	
Number Of Lots	15	7		22	Plan Number 190620
Contribution Entitlements	240	100	-100	240	<input checked="" type="checkbox"/> No Intro Letters For StrataMax
Interest Entitlements	240	100	-100	240	

Auto Fill
 Starting Account Code: 02100015 Lot: 15 Unit: 15 Contribution Entitlements: 10 Interest Entitlements: 10

Account Code	Lot Number	Unit Number	Contribution Entitlements	Interest Entitlements	Car Space Number
02100015	00015	15	10	10	
02100016	00016	16	10	10	
02100017	00017	17	10	10	
02100018	00018	18	10	10	
02100019	00019	19	10	10	
02100020	00020	20	10	10	
02100101	00101	101	40	40	

Previous Next

1. Enter Number of New Lots (total Lots will automatically update).
2. Enter total of new entitlements - Cancellation of Resub entitlements is shown as a reduction.
3. Tag *No Intro Letter for StrataMax*, as these are issued at a later stage when the Owners Info is updated to the purchasers of the New Lots.
4. Auto Fill – enter the *starting Account Number*– ensure the account number entered matches the Starting Lot Number, enter the unit number.
5. Enter the most common entitlement value for the new lots (contribution and interest). For some States there will be only 1 entitlement value per lot (entitlement liability).
6. The table will automatically populate based on the Auto Fill information, with sequential numbers populating to the table.
7. Click in each field that requires editing to enter the correct values, or on the keyboard press enter to move down to the next field.
8. For staged developments there is usually a new balance lot – ensure the Account Code is edited to match the lot number.
 - (See example above - Added lots 15 to 20 plus balance lot 101. The final new lot in the table is lot 101, so the account number code is edited to 02100101, as well as the lot number).
9. Ensure all entitlements are correct as per the Registered Schedule of Entitlements, and edit where necessary.
10. The entitlements total will update in the top section, as well as showing the reduction by the cancelling of the Resubdivision Lot. This provides a check point that the total entitlements agree

with the registered schedule.

11. Select *Next* to move to the next setup screen.

Owners Details

1. This screen is where the owner's details for the new lots are populated.
2. By selecting the *Auto Fill* arrow, a drop-down box appears with the option to *Copy from Existing account* (i.e. Resubdivided Lot) – information from the **Roll** for this lot will be copied to the new lots.
3. There is also an option to select another lot from the existing Roll to emulate details for new lots.
4. Alternatively, manual entry of owner details may be input for any or all new lots.
5. Normally where a staged development is being setup, the new lots are in the name of the Developer until such time as sales are finalised, therefore at the setup stage the developer will be the owners of all lots.
6. Select *Next* to move to the next setup screen.

Levy Adjustment

Once the levy adjustment process has been completed, these will create Pro-Rata entries in **Levy Management**. These should not be edited. Please contact Support if there an example where this is required.

The screenshot displays the 'Levy Adjustment' screen. At the top, there are dropdowns for 'Plan/Resub Date' (17/02/2020) and 'Date For Levy Adjustment' (17/02/2020). Below this is a table of levy periods. The table has columns: Levy, Include, Levy Type, Period, Rate per U/E, Adjustment, Original Total Charge, and Adjusted Total Charge. The table lists several levy periods, including 'Admin Fund' and 'Sinking Fund'. A pop-up window titled 'Resubdivision Charge Detail' is open, showing a table of account codes and updated charge amounts. The table has columns: Account Code, Updated Charge Amount, and Updated Charge Unit. The table lists account codes from 02100006 to 02100012, with updated charge amounts ranging from 1,177.78 to -177.78 and updated charge units of 100.

Levy	Include	Levy Type	Period	Rate per U/E	Adjustment	Original Total Charge	Adjusted Total Charge
00001	<input checked="" type="checkbox"/>	Admin Fund	01/02/20 to 30/04/20	10.00000000	Details	6000.00	11000.00
00002	<input checked="" type="checkbox"/>	Admin Fund	01/05/20 to 31/07/20	10.00000000	Details		
00003	<input checked="" type="checkbox"/>	Admin Fund	01/08/20 to 31/10/20	10.00000000	Details		
00004	<input checked="" type="checkbox"/>	Admin Fund	01/11/20 to 31/01/21	10.00000000	Details		
00005	<input checked="" type="checkbox"/>	Admin Fund	01/02/21 to 30/04/21	10.00000000	Details		
00006	<input checked="" type="checkbox"/>	Sinking Fund	01/02/20 to 30/04/20	5.00000000	Details		
00007	<input checked="" type="checkbox"/>	Sinking Fund	01/02/20 to 16/02/20	0.88888889	Details		

Account Code	Updated Charge Amount	Updated Charge Unit
02100006	1,177.78	100
02100007	-177.78	-100
02100008	-177.78	-100
02100009	-177.78	-100
02100010	-177.78	-100
02100011	-177.78	-100
02100012	-177.78	-100

1. The *Plan / Resub Date* will automatically populate at top – based on the date entered in Screen 1, and will also populate the *Date for Levy Adjustment*.
2. However, if the adjustment to levies is required to be affected from a future date (e.g. date of start of next levy period) the *Date for Levy Adjustment* may be edited to the required date.
3. Each levy period is listed, including future levies, and can be included (or un-tick if recalculation is

not required), with the pro-rata adjustments for the affected levy period highlighted in Green.

4. The first line for each levy displays the original levy, showing cancellation of the full levy for the Resub Lot, and the New Lots are added and levied for the full period.
5. A second line, *highlighted in Green*, shows the pro-rata debit for the resub Lot and pro-rata credit for the New Lots - calculated from the start of the levy period to the day prior to the date of Registration of the Resubdivision. Period shows the date range for the pro-rata adjustments. If the current levy is unticked for recalculation (i.e. the Date for Levy Adjustment is to be from the next levy period), the pro-rata adjustment line will be removed.
6. The pro-rata adjustments are automatically calculated based on the number of days prior to the date of registration as a ratio of the days in the levy period.
7. The *Details* button next to each Levy in the table can be clicked to display all details of the charges to the Lots.
8. Any of the Levies may be unticked in the *Include* column to exclude that levy from recalculation. This is another option for excluding the current levy from recalculation.
9. The future levies in the table will be updated to include the new lots at the appropriate entitlement for each, and set the Resubdivided lot to zero entitlements, and becoming inactive in the *Building Information Lot Type Editor screen*.

Custom Levies

1. If there are Custom levies in the table, and the new Lots are to be included, the *original levy* will need to be edited by clicking on the Details button.
2. A table showing the new Lots will appear, and any or all may be included for recalculation by entering a charge rate (either entitlement or appropriate charge rate as per the custom schedule) for each Lot to be added to the Custom levy. The *Set all Custom Charge Units* box can be utilised to auto populate the charge rate to all new Lots. For any Lot to be excluded from the Custom Levy the charge rate is entered as 0.

Resubdivision Charge Detail

☐ Show Changes Only

Levy Period: 01/05/20 to 31/07/20

Levy total charge changed

Set All Custom Charge Units: 1

Account Code	Custom Charge Unit	Existing Charge Amount	Updated Charge Amount	Existing Charge Unit	Updated Charge Unit
02100015	1		65.00	1	1
02100016	1		65.00	1	1
02100017	1		65.00	1	1
02100018	1		65.00	1	1
02100019	1		65.00	1	1
02100020	1		65.00	1	1

02100101	0		0.00		0

Close

3. Future Custom Levies will not automatically update, and will require the new Lots to be added by editing the relevant levy in Levy Management.
4. Select *Next* to move to the next setup screen.

Reverse or Adjustment levy

When doing a Resubdivision or Change of Entitlements where levies are affected, there's an option to choose how the adjustment is done. If, for instance, the current Entitlements per lot are 1 but should be 10, and this has been updated in the Entitlement screen when you are in the Levy Adjustment screen, the following needs to be taken into account:

Option 1 – Reverse

- Reverse the existing levy
- Create a new levy for the final amount
 - In this example, it would have reversed the levy with 1 unit of entitlement and created a levy with 10 units of entitlement.

Option 2 – Adjustment

- The original levy is left behind
- Create a new levy with just the adjustment difference
 - When this option is selected, it creates a levy with 9 units of entitlement, with the existing 1 unit to match the total of 10.

This is determined based on whether you click *Reverse* or not. The adjustment feature simplifies handling discounts and other scenarios, while presenting two distinct lines for levy periods on the certificate—an important consideration for preference on this document.

The *Reverse* option is limited when discounts are applied and is not applicable when the old year has been marked with a Y for an Audit in Building Information. It does provide one line for the certificate.

The screenshot shows the 'Levy Adjustment' window with the following details:

- Plan/Resub Date: 29/09/2025
- Date For Levy Adjustment: 29/09/2025
- The date for levy adjustment is usually the Registration Date for the Resub. Plan. However you may choose to use the start of the next period if required.
- Levies affected:

Levy	Include	Description	Period	Type	Rate per U/E	Adjustment	Original Total Charge	Adjusted Total Charge	Schedule	Reverse
201	<input checked="" type="checkbox"/>	Administrative Fund	01/07/25 to 30/09/25	Regular	82.50000000	Details Levy total charge changed	330.00	165.00	Contribution	<input type="checkbox"/>
****		Administrative Fund	01/07/25 to 28/09/25	Regular	80.70652174	Details Pro-rata 90 of 92 days		1614.14	Contribution	
****		Administrative Fund	29/09/25 to 30/09/25	Regular	1.79347826	Details Pro-rata 2 of 92 days		238.53	Contribution	

A red arrow points to the 'Reverse' checkbox in the first row.

Resub Remaining Balance

The screenshot shows the 'Resub Remaining Balance' window with the following details:

- 02100006 Year To Date: 1,500.00 Levy Adjustments: -1,233.33 Remaining Balance: 266.67
- Account Code: Account Name: Adjustment

A dropdown menu is open, showing the following options:

- Leave Balance
- Leave Balance
- Redistribute Evenly
- Redistribute By Entitlement
- Move To Lot

Buttons at the bottom: Previous, Next

1. After the levy adjustment process has been completed, there is likely to be a remaining balance on the now extinguished (cancelled) Resubdivided Lot.
2. This section provides 4 options by which the balance for this Lot can be cleared:
 - *Leave Balance* on the Resub Lot. Often if the pro-rated levy had been paid in full the resub process will result in a credit balance remaining on the Lot. This may be left on the Lot for refunding to the Developer.
 - *Redistribute Evenly*. This will distribute any Resub remaining balance on the extinguished Lot evenly to all new Lots (regardless of whether the balance is a debit or credit).
 - *Redistribute by Entitlement*. This option will distribute the Resub remaining balance to the new Lots in relation to each lot's entitlement (contribution).
 - *Move to Lot*. This option is commonly selected where there is a new balance Lot which will be retained by the developer.
3. Select *Next* to move to the finalise screen.

Finalise

The very last screen provides a report for the purpose of checking all setup data prior to selecting the *Process Resubdivide Lot* button.

Finalise

Lot Changes:

Lot Account	Lot No.	Unit No.	Car Space No.	Car Space No.	Contribution Entitlements	Interest Entitlements	Adjustment
02100007	00007	7		SAM SMITH	100	100	44.45
02100008	00008	8		TRUDIE LANE	100	100	44.45
02100009	00009	9		BRIAN KENT & SUSAN KENT	100	100	44.45

Levy Adjustments:

Lot Account	Levy Type	Levy Period	Charge Units	Adjustment Amount	Original Charge Units	Original Amount
02100006	Admin Fund	01/02/20 to 30/04/20	0	-1,000.00	100	1,000.00
02100006	Admin Fund	01/05/20 to 31/07/20	0	0.00	100	1,000.00
02100006	Admin Fund	01/08/20 to 31/10/20	0	0.00	100	1,000.00

Levy Pro-Rata Adjustments:

Lot Account	Levy Type	Levy Period	Charge Units	Adjustment Amount	Based Off Levy Period
02100006	Admin Fund	01/02/20 to 16/02/20	100	177.78	01/02/20 to 30/04/20
02100006	Sinking Fund	01/02/20 to 16/02/20	100	88.89	01/02/20 to 30/04/20
02100007	Sinking Fund	01/02/20 to 16/02/20	-100	-88.89	01/02/20 to 30/04/20

Buttons: ☒ Data Storage Before Process

1. It is strongly recommended that the Print Report button is clicked, and the report checked.
2. The report is in 3 parts:
 - *Lot Changes*: This details the new Lots added to the relevant levies for the selected Date for Levy Adjustment. i.e new Lots added and the Resubdivided Lot deducted. The methodology applied for the Resubdivision, is that the Resubdivide Lot is credited for the full Levy period, and the New lots are debited for the Full Levy period. The pro-rata adjustments (debit or credit) for the period prior to the date for Levy Adjustment are then shown in Levy Pro-Rata Adjustments.
 - *Levy Adjustments*: This section details changes to the *Resubdivision Lot* for all levies. The levy for the Resub period is cancelled and the charge rate for future levies reset to 0.

- *Levy Pro-rata Adjustments:* This section details the Debit pro-rata charge for the Resubdivision Lot up to the day before date of Registration. In addition the pro-rata credit adjustments applied to the new Lots for the period from the start of the levy period to the day prior to the date of Registration (or Date for Levy Adjustment, if different).
3. If any data entered is incorrect, click on the *Previous* button at the bottom to return to the appropriate setup screen to edit where required, then click *Next*.
 4. Tag *Data Storage Before Process*.
 5. Select *Process Resubdivide Lot*.
 6. *Close*.

All processes will be run to effect all the changes required to complete the Resubdivision. The **Roll** is updated to rename the Resubdivided Lot as *Resubdivided*, and include the new lots.

Ledger Cards will show the changes, and Levy Notices may be printed for the new lots, if required.

These are normally required if settlements are imminent for the purchasers of the new lots. After settlements are finalised and the **Roll** updated to the purchaser's name, it is normally the appropriate time to issue the *Intro Letters for StrataMax*.

Change Existing Lot Entitlements

This option is selected to change existing lot entitlements for one or more lots, as per the new registration document, or to amalgamate 1 or more lots. Note that an amalgamation will normally require all entitlements from one lot to be moved to another lot (normally both having the same owners), and therefore will process as a reallocation of entitlements.

When applying this process, if there is a change in entitlements, a reverse option will be available when the levies are presented. It is recommended to use that option. If you are adding new lots, follow the instructions below and do not reverse the levies.

If the registration of a new plan includes an original lot to remain but a change of the entitlements is to occur on the original lot and to include new lots as a result, this can be achieved by using the 'Add New Lots' process first, and then applying again to **Change existing lot entitlements** for the original lot, which is a two-step process. The finished result should match the schedule of entitlements.

1. Search or select **Resubdivision/ Reallocation**.
2. Enter the date of Registration of the Change of Entitlements in *Plan/Resubdivision Date*.
3. Select *Change existing lot entitlements*.

4. Select *Next* to move to the next setup screen.

Change Entitlements Screen

1. All existing lots are shown in the table and entitlements can be edited as per the new registration document entitlement schedule.
2. As entitlements are amended the total at top of the pages is updated. The total after all entitlement changes have been updated should match what is shown on the registration document entitlement schedule. This is an important check before proceeding to the next screen.
3. Select *Next* to move to the next setup screen.

Levy Adjustment

Once the levy adjustment process has been completed, these will create pro-rata entries in **Levy Management**. These should not be edited. Please contact Support if there an example where this is required.

The 'Levy Adjustment' screen shows the recalculated charges to the affected lots, with the system calculating the rate and adjustment of each levy based on the Plan/Resubdivision date entered in the main screen.

1. The schedule of levies shows all levies from the **Levy Management** schedule, and details of the current and future levies can be viewed by clicking on the details button.
2. The current levies have a pro-rata adjustment line detailing the adjustments to lots with a change of entitlements.
3. Future levies are recalculated based on the new entitlements for each lot.
4. Select *Next* to move to the finalise screen.
5. Ensure to click *Finish*.

Previous Next

Finalise

Two reports are provided and should be checked prior to selecting *Process Entitlement Changes*

1. New Lots: This lists the Lots that have had a change of entitlements and shows the new entitlements recorded for each lot.
2. Levy Changes: Shows the new entitlements and levy charge for each lot where a change of entitlement has occurred. The report shows current and future levies.
3. Click *Finish*.
4. *Close*.

Add New Lots

This option allows new lots to be added to the scheme without affecting existing lots (i.e. there is no resub lot).

If the registration of a new plan includes an original lot to remain but a change of the entitlements is to occur on the original lot and to include new lots as a result, this can be achieved by using the 'Add New Lots' process first, and then applying again to [Change existing lot entitlements](#) for the original lot, which is a two-step process. The finished result should match the schedule of entitlements.

1. Search or select **Resubdivision/ Reallocation**.
2. Enter the Registration date of the Addition of New Lots in the *Plan/Resubdivision Date* field.
3. Select *Add New Lots*.
4. Select *Next* to move to the next setup screen.

Add Lots / Resubdivision / Reallocation of Entitlements

Start

Plan/Resubdivision Date: 15/10/2022 (Refer to CMS document or Online Help for correct date)

NOTE: This process will handle adjustments to levies. You do not need to reverse or delete any future levies. No changes are made until the final step, and it is validated and processed as a single step.

☐ Resubdivide to add new lots
 Subdivide a lot into multiple new lots

☐ Change existing lot entitlements
 Change entitlements of existing lots, reallocations and amalgamation.

☒ Add new lots
 Add new lots without affecting entitlements of existing lots

☒ Add Linked Debtors In Subgroup

Back Next Cancel

Add New Lots (Linked Debtors in Sub-Group)

If an existing Sub-Group is attached to the Main, there is an option to add these new lots (Debtors) to the Sub-Group simultaneously. If this is the case, tick *Add Linked Debtors in Sub-Group*. This will create a data link between each main **Roll** and the sub-group **Debtor Maintenance** record. [Unlink](#) the data links if these contacts are different between the groups.

1. Search or select **Resubdivision/ Reallocation**.
2. Enter the Registration date of the Addition of New Lots in the *Plan/Resubdivision Date* field.
3. Select *Add New Lots* and tick *Add Linked Debtors in Sub-Group*.
4. Select *Next* to move to the next setup screen.

Once the add new lots process has been finalised, using the below steps to go to the Sub-Group and add meters to the **Utility Billing / Meter Maintenance** area if these new lots are to be included in any utility billing process.

Plan Setup

1. Check the new *Plan number* from the registration document.
2. Enter Number of New Lots (total lots will automatically update).
3. Tag *No Intro Letter for StrataMax*, as these are issued at a later stage, once the Owners' Info is updated for purchasers of the New Lots.
4. Auto Fill – enter the starting Account Number; ensure the entered account number matches the Starting Lot Number, and enter the unit number.
5. Enter the most common entitlement value for the new Lots (contribution and interest) – for some states, there will be only 1 entitlement value for each Lot.
6. The table will automatically populate based on the Auto Fill information, with sequential numbers

populating the table.

- Click in each field that requires editing to enter the correct values. Press enter to move to the next field down - this streamlines the data entry where large numbers of Lots are added.

- Select *Next* to move to the next setup screen.

Plan Setup - Import Excel spreadsheet

Depending on what how many lots are in the building, if this information is available via Excel there is an option to import this information at the plan setup screen. This information does need to be formatted with certain columns as per the example below before importing this spreadsheet.

	A	B	C	D	E	F	G	H
1	Code	Lot_Number	Contribution_Entitlements	Interest_Entitlements	Unit_No	Car_Space	Building_Number	Plan_Registration_Date
2	02100005	5	1	1	5			1/10/19
3	02100006	6	1	1	6			1/10/19
4	02100007	7	1	1	7			1/10/19
5	02100008	8	1	1	8			1/10/19
6	02100009	9	1	1	9			1/10/19
7	02100011	11	1	1	11			1/10/19
8	02100012	12	1	1	12			1/10/19

- Tag *No Intro Letter for StrataMax*, as these are issued at a later stage when the Owners Info is updated to purchasers of the New Lots.
- Auto Fill – select the Excel icon and locate the completed spreadsheet and click *Open*.
- Check the new Plan number from the Registration document and enter this.

Back Next Cancel

- Review the table of the plan setup and check that each entry is as expected.
- Click *Next*.

Owner Details

- This screen is where the Owner's details for the new Lots are populated.
- By selecting the Auto Fill arrow, a drop-down box appears with the option to *Copy from Existing account*. Select the Lot from the existing Roll to emulate details for new Lots.
- Alternatively, manual entry of Owner details may be input for any or all new Lots.
- Select *Next* to move to the next setup screen.

Levy Adjustment

Once the levy adjustment process has been completed, these will create Pro-Rata entries in **Levy Management**. These should not be edited. Please contact Support if there is an example where this is required.

- The *Plan / Resub Date* will automatically populate at top – based on the date entered in Screen 1 and will also populate the *Date for Levy Adjustment*.
- However, if the adjustment to levies is required to be affected from a future date (e.g. date of start of next levy period) the *Date for Levy Adjustment* may be edited to the required date.
- The 'Levy Adjustment' screen displays all levies from the **Levy Management** schedule.
- The original levies for the current period (in which the New Lots registration date occurs), showing the new Lots added.
- A second line, highlighted in green for the current levies, is inserted showing the pro-rata adjustments to be posted for the new Lots. If the current levy is unticked for recalculation (i.e. start of next levy period selected for date of Levy Adjustment) the pro-rata adjustment line will be

removed.

6. The pro-rata adjustments are automatically calculated based on the number of days prior to the date of registration as a ratio of the days in the levy period.
7. The *Details* button next to each levy in the table can be clicked to display all details of the charges to the lots.
8. Any of the levies may be unticked in the *Include* column to exclude that levy from adjustments. This is another option for excluding the current levy from recalculation.
9. The future levies in the table will be updated to include the new Lots at the appropriate entitlement for each lot.
10. Select *Next* to move to the finalise screen.

Finalise

The last page reports the proposed changes, in three sections:

- New Lots.
- Pro-rata adjustments for the new Lots for the period of the levy prior to date of Registration.
- When data is checked and correct, select *Process Add Lots* to complete the process.

Amalgamating Multiple Lots into One Lot

If multiple lots are to be amalgamated into one lot, the following process applies. It should be noted that having an action plan of how this process should finalise is recommended and will be done in multiple stages.

1. Search or select ***Resubdivision/ Reallocation***.
2. Enter the Registration date of the Addition of New Lots in the *Plan/Resubdivision Date* field.
3. Select *Resubdivide to add new lots* and ...button to select the *Lot for Resubdivision*.
4. Select *Next* to move to the next setup screen.

Plan/Setup

1. Check the new *Plan number* from the registration document.
2. Enter Number of New Lots (total lots will automatically update).
3. Tag *No Intro Letter for StrataMax*, as these are issued at a later stage, once the Owners' Info is updated for purchasers of the New Lots.
4. Auto Fill – enter the starting Account Number; ensure the entered account number matches the Starting Lot Number, and enter the unit number.
5. Enter the most common entitlement value for the new Lots (contribution and interest) – for some states, there will be only 1 entitlement value for each Lot.
6. The table will automatically populate based on the Auto Fill information, with sequential numbers generated.
7. Click in each field that requires editing to enter the correct values.

02100033 Year To Date: 2,419.22 Levy Adjustments: -511.60 Remaining Balance: 1,907.62 [Move To Lot](#) Destination Lot: 02100040

Account Code	Account Name	Adjustment
02100040		1,907.62
02100033		-1,907.62

Back Next Cancel

It is recommended to review an [Aged Balance List](#) or an [Account Dissection Report](#) to select the lot account with the largest balance for transitioning. This will reduce clicks in [Debtor Adjustment](#) with

adjusting lot balances.

Finalise

The last page reports the proposed changes in three sections, which are important to review.

- New Lots.
- Pro-rata adjustments for the new Lots for the period of the levy prior to date of Registration.
- When the data is checked and correct, select *Finish* to complete the process.

Change of Existing Entitlements

Reopening the Add New Lots / Resubdivision / Reallocation of Entitlements window is where the other lots that have been extinguished are actioned as stage 2 of this process of amalgamating multiple lots into one.

1. Search or select ***Resubdivision/ Reallocation***.
2. Enter the Registration date of the Addition of New Lots in the *Plan/Resubdivision Date* field. This will be the same date used in the first stage of the amalgamation process.
3. Select *Next* to move to the next setup screen.

Change Entitlements Screen

With the amalgamation process having extinguished one of the lots, to create the new lot, the following process will allow the others to now be extinguished too, with the overall result being the correct entitlements for the building and new lot.

1. All existing lots are listed in the table, and entitlements can be edited in accordance with the new registration document's entitlement schedule.
2. As entitlements are amended, the total at the top of the pages is updated. The total after all entitlement changes are applied should match the amount shown on the entitlement schedule in the registration document. This is an important check before proceeding to the next screen.

Change Entitlements

Levy Adjustment

1. The *Plan / Resub Date* will automatically populate at the top – based on the date entered in Screen 1, and will also populate the *Date for Levy Adjustment*.
2. However, if the adjustment to levies is required to be affected from a future date (e.g. date of start of next levy period) the *Date for Levy Adjustment* may be edited to the required date.
3. The 'Levy Adjustment' screen displays all levies from the **Levy Management** schedule.
4. The original levies for the current period (in which the New Lots registration date occurs), showing the new Lots added.
5. A second line, highlighted in green for the current levies, has been inserted to show the pro-rata adjustments to be posted for the new Lots. If the current levy is unticked for recalculation (i.e. start of next levy period selected for date of Levy Adjustment) the pro-rata adjustment line will be removed.
6. The pro-rata adjustments are automatically calculated based on the number of days prior to the date of registration as a ratio of the days in the levy period.
7. The *Details* button next to each levy in the table can be clicked to display all details of the charges to the lots.
8. Any of the levies may be unticked in the *Include* column to exclude that levy from adjustments. This is another option for excluding the current levy from recalculation.
9. The future levies in the table will be updated to include the new Lots at the appropriate entitlement for each lot.
10. Select *Next* to move to the next screen.

Finalise

The last page reports the proposed changes in three sections, which are important to review.

- New Lots.
- Pro-rata adjustments for the new Lots for the period of the levy prior to date of Registration.
- When the data is checked and correct, select *Finish* to complete the process.

Debtor Adjustment

Any remaining balance on the change of entitlement lots should be reviewed and transferred to the new lot account. This will be done using **Debtor Adjustment** / Reallocate Funds between Lots and Second Debtors feature. Repeat this for any affected lots.

□
