

StrataPay Payables

Last Modified on 01/07/2024 10:00 am AEST

StrataPay Payables was built as a bank agnostic way for our clients to make bulk payments from any account to any BPAY biller in Australia. This uses the existing way that the creditors are managed and the standard payment process without any need for additional file uploads to any online banking platform.

These articles all refer to payments via BPay:

- [Creditor Invoices](#)
- [EFT Manager](#)
- [Payment Entry](#)
- [Payment Process](#)
- [Payments](#)
- [Payments Management](#)

There are fees and charges associated with the use of this product, including a 0.55 cent transaction fee unless otherwise agreed. Please note there are also charges associated with returned payments where an amount paid is under the biller's minimum payment limit. Please refer to the StrataPay Payables section of the StrataPay (Strata) PDS here: <https://www.stratapay.com/Important-Information/Disclosure>
